

AC Estival

(Formerly PS-1117)

Product Benefits:

- High yield for most difficult harvest window in the fall transition season
- Able to hold in the field longer than the competition

Product Features:

- Strong Heading
- Thick Texture
- Slow Bolting
- High field tolerance to Fusarium

VARIETY: AC Estival
(formerly PS 1117)

TYPE: Iceberg

REGION: Huron & Desert

WET DATES*:

Huron: 8/15 - 8/20

Desert: 9/1 - 9/12

AC Estival is a strong heading, slow bolting, and thick textured iceberg variety for the front-end of the Huron and Desert fall transitions. Over two years of trials and commercial plantings it has shown to be superior to the competition in yield. It also has shown a high tolerance to Fusarium in large plantings in the Southwest Desert.

* Information provided is suggested, based on trial results to date. Performance may vary under different field conditions and cultural practices. Always consult with your Pinnacle Seed representative for specific information about your particular growing situation.

AC Estival is the exclusive property of Agriculture and Agri-Food Canada. Under no circumstances shall the seed or plants grown from the seed be propagated, reproduced, multiplied, or distributed without express written consent from Agriculture and Agri-Food Canada or Pinnacle Seed, Inc.
